

PHYSICS ENROLLMENT TIPS

These are the most common enrollment errors when trying to enroll in Physics 5, 6, 7 lectures and labs. Please read through this document to help you become more proficient at using your MyUCSC portal to successfully enroll in physics courses.

Good luck!

--Physics

❑ ERROR MESSAGE: “REQUISITES NOT MET....”

Hint: “Requisites” refer to all prerequisites and corequisites associated with a course. Check the Catalog and your MyUCSC portal to make sure that you have passed all the prerequisites. Then enroll in the course and its corequisite(s) in the same transaction.

Example 1: Phys 6A has corequisites of Phys 6L and Math 11A or 19A. If you have NOT taken any of these, you will need to add them in the same transaction as when adding 6A. (type in 6A class number, type in 6L class number, type in 11A or 19A class number, click on “Submit”)

Example 2: Phys 6B has prerequisites of Phys 6A, 6L, and Math 11A or 19A. All of these must be completed before you can enroll in Phys 6B.

❑ ERROR MESSAGE: “REQUISITES NOT MET....” (but you’re sure that you have met all prerequisites and have tried the previous tip)

Hint: Students who entered prior to Fall 2005 may have AP credits and transfer credits that have not been articulated to UCSC course prerequisites. You can check on these credits by logging on to your MyUCSC portal--click on **Academic Progress/Transfer Credit Report** and the “**Other Credits**” link. If you cannot find anything under this link, and you have AP or transfer credits that meet prerequisites for this course, then go see your major advisor for assistance.

❑ IF NONE OF THE ABOVE APPLY, PLEASE EMAIL, CALL OR STOP BY TO SEE THE PHYSICS UNDERGRAD ADVISOR FOR ASSISTANCE.
